## Backend Engineer | Node.js • Express • NestJS

Phone: 09159965475 | Email: musbautunji@gmail.com | GitHub: github.com/Olatunji0001

### PROFESSIONAL SUMMARY

Backend-focused engineer building scalable, production-ready systems using Node.js, Express, and NestJS. Experienced in designing REST APIs, authentication systems, payment integrations, and multi-store e-commerce architectures. Strong focus on clean architecture, performance optimization, and maintainable codebases.

### TECHNICAL SKILLS

- Backend: Node.js, Express.js, NestJS
- Frontend: React.js, Next.js
- Database: MongoDB, Mongoose
- Architecture: REST APIs, MVC, Service Layer Pattern
- Authentication: JWT, Role-Based Access Control (RBAC)
- Payments: Flutterwave Integration
- Tools: Git, GitHub, Postman

### SELECTED PROJECTS

- Multi-Store E-commerce Backend – Designed scalable backend architecture supporting multiple sellers, weight-based delivery fees, checkout logic, and store-level payout calculations.
- Payment & Payout Infrastructure – Implemented structured payment flow with delivery fee computation and seller payout separation logic.
- Authentication & Authorization System – Built secure login, protected routes, and role-based access control for customers and sellers.

### VALUE OFFERING

Open to backend-focused roles where I can design scalable APIs, improve system architecture, and contribute to production-grade applications. Available for remote or on-site opportunities.
